STUDENT LEARNING ACHIEVEMENT

Bangkit ID : A147DSX3364
Name : Muslim Hakim Muhammad
University : Universitas Bhayangkara Jakarta Raya

Bangkit Completion : Full Graduate
Learning Path : Mobile Development
Capstone Status : Finished

No	Courses/Specialization/Activities	Learning Outcome	Hours	Score (0-100)	Score Description
1	Kotlin Basic	By the end of the course, the student will be able to comprehend the basic concepts of programming languages, functional programming, and object-oriented programming (OOP) using Kotlin.	50	74	The student well comprehends the basic concepts of programming languages, functional programming, and object-oriented programming (OOP) using Kotlin.
2	Android Programming for Beginners	By the end of the course, the student will be able to build an Android applications that display lists and detailed data.	60	74	The student is skilled in building Android applications that display lists and detailed data.
3	Android Fundamental	By the end of the course, the student will be able to build applications that allow fetching data from Web API and storing data locally.	140	80	The student is proficient in building applications that allow fetching data from Web API and storing data locally.
4	Intermediate Android Development	By the end of the course, the student will be able to build an application by implementing various existing components, such as UI, Animation, Localization, Background Process, Media, Sensor, Location, Database, Testing, Firebase, and Jetpack Compose.	100	72	The student is adept at building an application by implementing various existing components, such as UI, Animation, Localization, Background Process, Media, Sensor, Location, Database, Testing, Firebase, and Jetpack Compose.
5	Build Android Apps using Jetpack Compose	By the end of the course, the student will be able to design the application interface using Jetpack Compose.	50	72	The student is skilled in designing the application interface using Jetpack Compose.
6	UX Design	By the end of the course, the student will be able to build a proper portfolio of a UX study case containing the entire process, from finding user problems, defining problems, exploring, and making prototypes, to testing them out.	23	72	The student is competent in building a proper portfolio of a UX study case containing the entire process, from finding user problems, defining problems, exploring, and making prototypes, to testing them out.
7	SOLID Paradigm	By the end of the course, the student will be able to apply the basic concepts of OOP and their relationships to solve problems in software design using 5 SOLID principles.	15	68	The student can adequately apply the basic concepts of OOP and their relationships to solve problems in software design using 5 SOLID principles.
8	Associate Android Developer Preparation	By the end of the course, the student will be able to comprehend the exam area and learn the Google-recommended references needed to pursue the exam.	40	100	The student is adept at comprehending the exam area and studying the Google-recommended references needed to pursue the exam.
9	Capstone / Final Project	By the end of the course, the student will be able to begin stages of a final project, namely developing an application/solution which validates their product development skills and boosts the portofolio.	200	93	The student is sufficiently able to begin stages of a final project, namely developing an application/solution which validates their product development skills and boosts the portofolio.
10	Soft skill & Career Development	By the end of the course, the student will be able to comprehend Life Path, Growth Mindset, The Power of Feedback, Time Management, Critical Thinking, Problem Solving, Adaptability, Resilience, Project Management, Professional Communication, Networking, Digital Branding, and Interview Communication	236	76	The student thoroughly comprehends Life Path, Growth Mindset, The Power of Feedback, Time Management, Critical Thinking, Problem Solving, Adaptability, Resilience, Project Management, Professional Communication, Networking, Digital Branding, and Interview Communication

Certificate #02

Sertifikat By Bangkit Dicoding

I have completed several IT courses from the Dicoding Indonesia platform, including:

- Kotlin Basic
- Android Programming for Beginners
- Android Fundamental
- Intemediate Android Development
- Build Android App using Jetpack Compose
- UX Design
- SOLID Paradigm
- Associate Android Developer Preparation
- Capstone / Final Project
- Soft Skill & Career Development

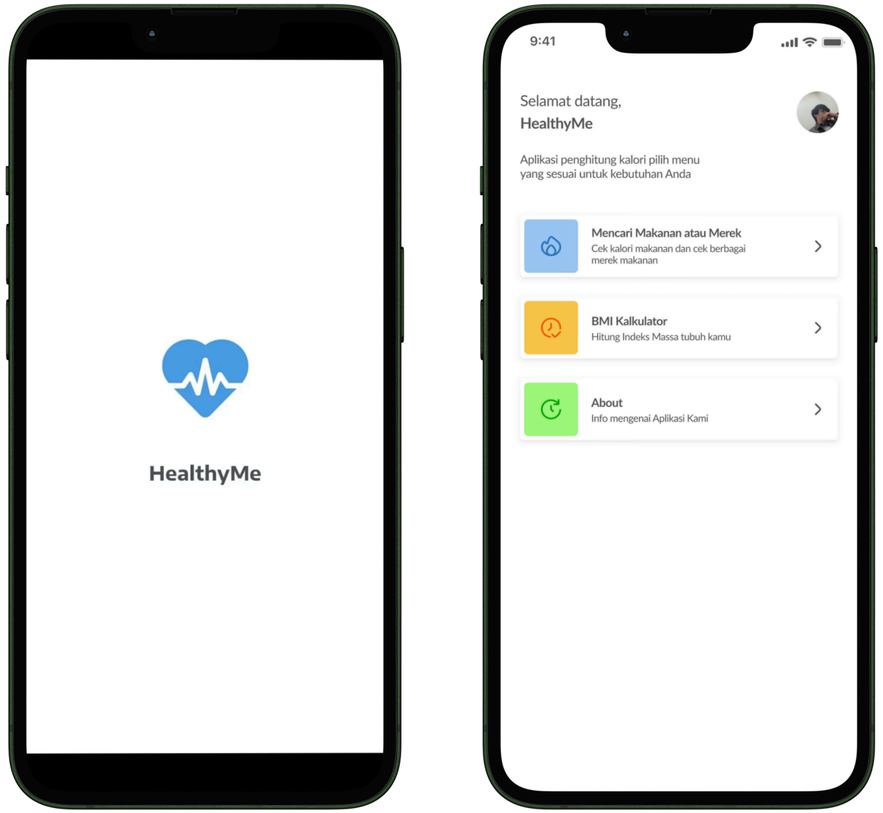

Project #01

Pet Friends

This project is a mobile application called Pet Friends, designed to help users manage pet care activities. The app simplifies monitoring pet health and daily needs while providing notifications to ensure important tasks aren't missed. With a user-friendly interface, users can easily schedule and view care activities efficiently.

Project #02

HealthyMe

This project is HealthyMe, a calorie counting application designed to help users manage their food intake and monitor their health. It simplifies the process of calculating calories in meals and tracking body mass index (BMI) with a user-friendly interface. This app is ideal for anyone aiming to achieve or maintain a healthy weight and improve overall well-being.

Project #03

CarePoint

This project is the CarePoint application designed to help users find hospitals in Indonesia. The application provides a list of selectable provinces and cities. It also includes important information about hospitals, such as room capacity, address, phone number, and the distance from the user's location. With an intuitive interface, CarePoint aims to improve accessibility to healthcare services for the community.

NativePHP MySQL PWA

Project #04

Tilawah Tracker

This project is the Tilawah Tracker application, a dedicated platform designed to help users maintain consistency in reading the Al-Qur'an. The application offers structured khatam programs, such as 25-day or 30-day targets, along with a manual mode for personalized pacing. Tilawah Tracker features a smart dashboard that organizes reading tasks by prayer times and includes a "Start Reading" button that automatically directs users to their last-read page in the integrated digital Mushaf. With a clean, intuitive interface and detailed progress statistics, Tilawah Tracker aims to provide a seamless and motivating spiritual journey for the Muslim community.
